

CNC EDM

Eisenmenger
Maschinen- und Formenbau CNC-Bearbeitung

This processing procedure is primarily applied at Eisenmenger where complex and fine tool contours are required. It is particularly suitable for the manufacture of injection and compression moulds. With our EDM it is possible for us to produce shapes with very small inner radii (up to 0.025 mm) accurately and to the highest surface quality.

Surface area: 820 x 400 mm

- x = 400 mm
- y = 220 mm
- z = 300 mm

Benefits

Very well suited for deep and narrow cuts in difficult to machine materials

- Surface structures with variable roughness and burr-free edges can be produced

Eisenmenger GmbH EDM machine
